

Integrated Management System (IMS)
Federal Appeals Application Release Memo
July, 2011

The application was modified to allow better performance and more efficient processing of the information. The following are items that were enhanced and/or modified in the Federal Appeals application:

- A) Agency Name - Corrected the issue where an error would occur if a case contained a long agency name. This error no longer occurs.

- B) Agency Number - Previously when a new appeal was created and more than one agency number or appeal was associated with it only the first agency number or associated appeal was listed on the Information tab. This has been corrected so that all associated appeals and agency numbers will be shown on the Information tab for the subject appeal.
