

**Integrated Mission System
Private Application
Release 6.5.2 Memo
DATE 7/21/14**

NEW INQUIRY

- The New Inquiry module has been modified to correct an issue with the APPLY button not enabling when all required fields had been entered, namely the RSP Address and Phone Number field. SCR 5672

FIND CHARGE

- The SELECT and DESELECT buttons on the Results tab are now in correct tabbing order. SCR 5686

ADD/MODIFY ALLEGATIONS

- If a user attempts to delete the last allegation associated with a J1 action, Cause Finding Issued, the user will be prompted with a message stating, "To delete this allegation, you must request the deletion of the affiliated J1 Action (Cause Finding Issued) through ServiceNow Service Catalog."
- " An OK button allows the user to dismiss the message and cancel the deletion action.

UTILITY ADD/MODIFY SECURITY

- The Hyperion option has been removed from the State & Local Access in the Utility's Security dialog. SCR 5671
- Now only OIT users with Global access are able to grant Global Access (level 4) to any IMS account, and will have the State & Local Write field enabled. SCR 5673
- For the Federal Appeals' Show Cause and FAIR Team fields the default has now been set to NO when creating new accounts. SCR 5673
- For Litigation Appeals, both the Read and Write Level fields are disabled for IMS FEPA accounts. SCR 5673
