

The Office of Information Technology (OIT) is pleased to inform you of the upcoming IMSNXG File Destruction Release 6.7 which will be available on September 2, 2014. The following enhancement is included in the release. Attached is a document detailing the changes to the File Destruction application:

FILE DESTRUCTION

A new tab feature allows users to search for charges that were destroyed, within a selected range of destruction dates, and restore all or a selection of the found charges by mass-deleting Action Z5 (SCR 5592).
